

May 2022

Dear New Families,

Welcome to Seven Hills!

We would like to be proactive and address any of your child's health concerns prior to the first day of school. If your child has any type of chronic medical condition such as asthma, insect or food allergy, diabetes or if you have any other concerns, please contact us. We may wish to coordinate a meeting with you and your student's teacher in August.

If your student has a diagnosed insect or food allergy, we would appreciate discussing your student's needs prior to the first day of school. Please contact the appropriate campus nurse and we will be in touch. Important documents are located on our web site. Please review the following forms located on our [webpage](#).

- The Seven Hills Insect and Food Allergy Guidelines
- Emergency Allergy Care Plan - must be completed by parent & MD, preferably an allergist
- Medication Consent Forms - must be completed by parents & MD, preferably an allergist

We are looking forward to meeting you and your child next school year.

Thank you,
